Future Minds Lab Initiative

TERMS OF REFERENCE 81-9-25

Title: External Trainer – Vocational Training in Game Programming

Location: Bosnia and Herzegovina

Level of Effort: 3 training days, 6 days of mentoring (spanning across 6 month-period) and 3 preparation days

Reporting to: Project Manager, Future Minds Lab Initiative

Type of Contract: Short-term Individual Contract

1. Background

Bosnia and Herzegovina faces a critical shortage of skilled professionals in the field of digital technologies. According to the OECD and UNICEF, the country suffers from limited access to digital infrastructure and a mismatch between education outputs and labour market needs. This digital gap is particularly felt among youth aged 19 to 29, who often lack opportunities for structured, market-relevant training that leads to employment and careers in high-demand digital sectors.

In response, the Future Minds Lab Initiative, implemented by the University Sarajevo School of Science and Technology (SSST) under the SEDEP Program and supported by GIZ, aims to provide future-oriented digital, green, and entrepreneurial skills to young people. One of its flagship interventions is a 6-month vocational training program, hosted by the ReWire Institute, SSST's national vocational training institute for the IT sector.

This program focuses on three key specializations: Game Design, Cyber Security, and Cloud Computing. These areas have been identified as high-growth and high-demand in both the domestic and regional labour markets. As part of this program, participants will undergo intensive, lab-based and project-oriented training aligned with employer needs.

The Game Design track specifically aims to equip participants with the creative, technical and practical skills necessary to enter the growing gaming and digital media industries - whether through studio employment or independent development. The training is designed to be hands-on and modular, empowering youth to build real-world portfolios and gain confidence through applied learning.

This Call for Proposals relates to the Game Programming component, designed to provide learners with core technical competencies for game development using C++ and Unreal Engine, with attention to coding standards, version control, and collaboration within development teams.

1. Kontekst

Bosna i Hercegovina se suočava s ozbiljnim nedostatkom kvalifikovanih profesionalaca u oblasti digitalnih tehnologija. Prema OECD-u i UNICEF-u, zemlja ima ograničen pristup digitalnoj infrastrukturi i nesklad između obrazovnih rezultata i potreba tržišta rada. Ovaj digitalni jaz posebno pogoda mlade od 19 do 29 godina, koji često nemaju priliku za strukturirane, tržišno relevantne obuke koje vode ka zapošljavanju u sektorima s visokom potražnjom.

Kao odgovor, Future Minds Lab Initiative, koju implementira Univerzitet SSST u okviru SEDEP programa i uz podršku GIZ-a, ima za cilj da mladima pruži digitalne, zelene i preduzetničke vještine usmjerene ka budućnosti. Jedna od glavnih aktivnosti je šestomjesečni program stručnog osposobljavanja koji vodi ReWire Institute – nacionalni institut SSST-a za IT sektor.

Program je fokusiran na tri ključne specijalizacije: Game Design, Cyber Security i Cloud Computing – oblasti prepoznate kao visoko rastuće i tražene na domaćem i regionalnom tržištu rada.
