

Vedad Herenda, MD, MA, internal medicine consultant

1. RESEARCH INTEREST (3-4 sentences total)

Interested in chronic kidney disease, how to prevent and treat it. Especially interested in link between kidney vs. heart and way these organs influence each other. Very keen to search for new information about causes, diagnostic approach and treatment of world's biggest killer: hypertension.

2. EDUCATION (Faculty, Doctorate)

Graduated from University of Sarajevo, Medical faculty. In the same institution did his postgraduate research and promoted to MA.

3. WORK EXPERIENCE

At the very beginning of his career he had worked several years in Emergency medical service in Sarajevo. There he discovered his passion for emergencies in medicine, teamwork and collaboration of different medical specialties. Latter, he continued his work in Clinical Center University of Sarajevo on Nephrology clinic where he still works as an internal medicine specialist.

4. TEACHING EXPERIENCE

He used to work as a lecturer in Medical school for different subjects, among them Internal medicine, Infective disease and Geriatry. More than decade he has been an instructor of first aid in Red Cross. For several years he taught basic and advance life support skills with different organisation.

5. PROFESSIONAL DEVELOPMENT

He finished several courses in basic and advance life support skills. In Red Cross attended several courses from disaster management. He specialized internal medicine and latter obtained his MA from University of Sarajevo, Medical School. In Ljubljana Clinical Center attended short training in organ transplant medicine. Member of national and international professional organisation in field of nephrology.

6. FUNDED PROJECTS

7. PUBLICATIONS

a) Original scientific papers
